

BANK AT AMADOR TRIAL MEMBERSHIP GUIDE

1. IMPLEMENTATION OVERVIEW

This script acts as the "brain" of your automation. It connects your Google Sheet (database) with Gmail (communication) to automatically manage the entire member lifecycle.

Prerequisites

- A Google Workspace account (club@amadorclub.com recommended)
- A Google Sheet set up with the specific column structure defined below
- Basic familiarity with the Google Sheets interface

How It Works

1. **Triggers:** The script runs automatically every day (Time-based) and whenever data changes (Event-based).
2. **Processing:** It checks every member's status, application date, and endorsement count.
3. **Action:** It sends the appropriate emails based on the 19-step workflow defined in your SOP.
4. **Logging:** It updates the "Last Email Sent" column to prevent duplicate emails.

2. GOOGLE SHEET STRUCTURE

CRITICAL: Your Google Sheet must match this structure exactly for the script to work. Create a sheet named **"TrialMembers"**.

COL	HEADER NAME	DESCRIPTION / DATA FORMAT
A	Application Date	Date (MM/DD/YYYY)
B	First Name	Text
C	Last Name	Text
D	Email	Text (Valid email address)
E	Phone	Text
F	Company Name	Text
G	Company Title	Text
H	Birthdate	Date
I	Gender	Text
J	Endorser 1 Name	Text
K	Endorser 1 Email	Text
L	Endorser 2 Name	Text
M	Endorser 2 Email	Text
N	Endorser 1 Status	Dropdown: Pending, Approved, Declined
O	Endorser 2 Status	Dropdown: Pending, Approved, Declined
P	Membership Status	Dropdown: New, Active, Canceled, Full Member, Expired Controls automation flow: - "Canceled" = Stops all automation, sends cancellation email - "Full Member" = Stops trial emails, member is approved - "Active" = Normal trial automation continues - "Expired" = Trial ended without approval
Q	Payment Status	Dropdown: Current, Failed, Expired
R	Last Email Sent	Text (Auto-updated by script)
S	Notes	Text (Staff notes)
T	Trial End Date	Date (Auto-calculated: Application Date + 6 months) Formula: <code>=EDATE(A2, 6)</code>

3. GOOGLE APPS SCRIPT CODE

Copy the code below entirely and paste it into your Google Apps Script editor (Extensions > Apps Script).

```
/**
 * BANK AT AMADOR TRIAL MEMBERSHIP AUTOMATION
 * Version: 1.0
 *
 * AUTOMATION FEATURES:
 * - New Application Processing
 * - Monthly Milestone Emails (Month 1-6)
 * - Payment Failure Alerts
 * - Endorsement Requests & Tracking
 * - Staff Notifications
 * - Expiration Management
 */

```

4. INSTALLATION INSTRUCTIONS

Step 1: Set up the Google Sheet

1. Create a new Google Sheet.
2. Rename the tab to "TrialMembers".
3. Copy the column headers exactly as listed in Section 2 (Row 1, Cols A-T).
4. **Add Formula to Column T (Row 2):** In cell T2, enter: `=EDATE(A2, 6)`
5. **Copy Formula Down:** After entering data in future rows, drag the formula down from T2 to auto-calculate trial end dates.

17

Trial End Date Formula: Column T uses `=EDATE(A2, 6)` which automatically adds 6 months to the Application Date in Column A. This gives staff and members a clear view of when the trial period expires. The formula will update automatically when you change the Application Date.

Step 2: Add the Script

1. In your Google Sheet, go to **Extensions > Apps Script**.
2. Delete any default code.
3. Copy the entire code block from Section 3 above.
4. Paste it into the editor.
5. Click the Save icon (disk). Name it "BankTrialAutomation".

Step 3: Create Triggers

You need to tell Google when to run these functions automatically.

1. In the Apps Script editor, click the clock icon (Triggers) on the left sidebar.
2. Click + **Add Trigger** (bottom right).
3. **Trigger 1 (Gmail Monitor - NEW!):**
 - Function: `checkForNewApplicationEmails`
 - Event Source: Time-driven
 - Type: Hour timer
 - Time: Every hour (or every 4 hours)
 - **What it does:** Watches club@amadorclub.com for "Amador - Survey Completed - Bank Trial Member" emails, extracts applicant data, adds to the sheet, and sends staff notification
4. **Trigger 2 (Milestones):**
 - Function: `checkMonthlyMilestones`
 - Event Source: Time-driven
 - Type: Day timer
 - Time: 9 am to 10 am
5. **Trigger 3 (Payments):**
 - Function: `checkPaymentStatus`
 - Event Source: Time-driven
 - Type: Day timer
 - Time: 8am to 9am

 **IMPORTANT - Gmail Authorization:** The first time you run `checkForNewApplicationEmails` , Google will ask you to authorize the script to access Gmail. Click "Review Permissions" → Select your account → Click "Advanced" → "Go to BankTrialAutomation (unsafe)" → "Allow". This is normal and required for Gmail monitoring.

Step 4: Test It

1. Add a test row to your sheet with your own email address.
2. Set the "Application Date" to 30 days ago (to test Month 1 email).
3. In the script editor, select `checkMonthlyMilestones` from the dropdown.
4. Click "Run".
5. Check your email and the "Last Email Sent" column in the sheet.

6. COMPLETE AUTOMATION TRIGGER FLOW

Here's exactly what triggers the automation and when:

 Trigger Type 1: Email-Based (Automatic Application Processing)

WHAT HAPPENS	WHEN	FUNCTION	RESULT
PeopleVine sends an email with the subject: "Amador - Survey Completed - Bank Trial Member"	When the applicant submits the trial form	<code>checkForNewApplicationEmails()</code> (Runs every hour)	 Extracts applicant data from email  Adds new row to Google Sheet  Sets status to "New."  Sends Template 1 to staff  Mark's email as read  Adds "Trial/Processed" label

 **How Email Parsing Works:** The `parseApplicationEmail()` The function uses regular expressions to extract data from the email body. You may need to customize the regex patterns in this function to match your exact PeopleVine email format. Check the script comments for examples.

Trigger Type 2: Time-Based (Daily Automation Checks)

TRIGGER	RUNS	FUNCTION	WHAT IT CHECKS
Payment Monitor	Daily 8-9 am	<code>checkPaymentStatus()</code>	Column Q = "Failed" → Sends Template 4
Milestone Monitor	Daily 9-10 am	<code>checkMonthlyMilestones()</code>	• Days since application • Column P (Status) • Sends Month 1-6 emails • At Day 120: Auto-sends Template 8 to endorsers if columns J-M are filled • Handles cancellations • Handles approvals • Handles expirations

 **AUTOMATIC ENDORSER EXTRACTION:** When applicants submit the PeopleVine form at <https://apply.amadorclub.com/form/15606> with endorser information, the script automatically extracts endorser names and emails from the notification email and populates Columns J-M. At Day 120, Template 8 endorsement request emails are automatically sent to both endorsers with one-click YES/NO buttons. **No manual data entry required!**

Trigger Type 3: Manual Status Changes (Staff Actions)

STAFF CHANGES COLUMN P TO	NEXT AUTOMATION RUN	WHAT HAPPENS
"Active"	The next day at 9 am	Sends Welcome Email (Template 2), starts 6-month trial automation
"Canceled"	The next day at 9 am	Sends Template 16 (member) + Template 17 (staff), stops all automation
"Full Member"	The next day at 9 am	Sends Template 13 (approval), stops trial emails
"Expired"	—	No emails sent, all automation stopped

Trigger Type 4: Endorsement Button Clicks (Web App)

WHO CLICKS	WHAT HAPPENS INSTANTLY	FUNCTION
Endorser clicks ✓ YES or ✗ NO in Template 8 email	✓ Updates Column N or O immediately ✓ Counts total endorsements ✓ If 2 complete → sends Template 12 to staff ✓ Shows confirmation page (Template 9)	<code>doGet()</code> (Web App Handler)

Trigger Summary:

- **Email Monitor:** Every hour (automatic application processing)
- **Payment Check:** Daily at 8 am
- **Milestone Check:** Daily at 9 am (includes auto-sending Template 8 at Day 120 if endorsers are listed)
- **Web App:** Instant (when endorser clicks YES/NO button in Template 8)

Complete Workflow Example

1. **10:15 AM:** Applicant submits PeopleVine trial form with endorser information at <https://apply.amadorclub.com/form/15606>
2. **10:16 AM:** PeopleVine sends "Amador - Survey Completed - Bank Trial Member" to club@amadorclub.com
3. **11:00 AM:** Script runs hourly Gmail check → finds email → extracts data (including endorser names/emails) → adds row with Columns J-M populated → sends Template 1 to staff
4. **2:00 PM:** Staff verifies payment → changes Column P from "New" to "Active."
5. **Next Day 9:00 AM:** Script detects "Active" status + 0 days → sends Welcome Email (Template 2)
6. **30 Days Later 9:00 AM:** Script detects 30+ days → sends Month 1 Email (Template 3)
7. **120 Days Later 9:00 AM:** Script detects 120+ days → sends Month 4 Email (Template 7) to member → automatically sends Template 8 to both endorsers (data already in Columns J-M from initial form)
8. **Same Day 3:00 PM:** Endorser 1 clicks ✓ YES in their email → instant update to Column N → Template 9 confirmation
9. **Same Day 4:00 PM:** Endorser 2 clicks ✓ YES → instant update to Column O → Template 9 confirmation → Script detects 2 endorsements → sends Template 12 to staff
10. **Next Day:** Staff changes Column P to "Full Member."
11. **Following Day 9:00 AM:** Script sends Template 13 (Congratulations!)

7. CUSTOMIZING EMAIL PARSING

The `parseApplicationEmail()` function needs to match YOUR actual PeopleVine email format. Here's how to customize it:

Step 1: Get a Sample Email

1. Submit a test trial application through your PeopleVine form
2. Check club@amadorclub.com inbox
3. Open the "Amador - Survey Completed - Bank Trial Member" email
4. Copy the entire email body text

Step 2: Identify the Data Format

Your email probably looks something like this:

```
New Trial Application Received

First Name: John
Last Name: Smith
Email: john.smith@example.com
Phone: (555) 123-4567
Company: Tech Corp
Title: CEO
```

Step 3: Update the Regex Patterns

In the script, find the `parseApplicationEmail()` function and adjust these lines to match your format:

```
const firstNameMatch = emailBody.match(/First Name[:\s]+(.+)/i);
const lastNameMatch = emailBody.match(/Last Name[:\s]+(.+)/i);
const emailMatch = emailBody.match(/Email[:\s]+([^\s@]+@[^\s@]+\.[^\s@]+)/i);
const phoneMatch = emailBody.match(/Phone[:\s]+(.+)/i);
const companyMatch = emailBody.match(/Company[:\s]+(.+)/i);
const titleMatch = emailBody.match(/Title[:\s]+(.+)/i);

// ENDORSER PATTERNS (NEW!)
const endorser1NameMatch = emailBody.match(/Endorser 1 Name[:\s]+(.+)/i);
const endorser1EmailMatch = emailBody.match(/Endorser 1 Email[:\s]+([^\s@]+@[^\s@]+)/i);
const endorser2NameMatch = emailBody.match(/Endorser 2 Name[:\s]+(.+)/i);
const endorser2EmailMatch = emailBody.match(/Endorser 2 Email[:\s]+([^\s@]+@[^\s@]+)/i);
```

🔗 **PeopleVine Form Fields:** Make sure your form at <https://apply.amadorclub.com/form/15606> includes these field labels:

- **Endorser 1 Name** (or "First Endorser Name")
- **Endorser 1 Email** (or "First Endorser Email")
- **Endorser 2 Name** (or "Second Endorser Name")
- **Endorser 2 Email** (or "Second Endorser Email")

The script supports multiple variations of these field names automatically!

💡 Regex Tips:

- `/First Name[:\s]+(.+)/i` matches "First Name: John" OR "First Name John."
- `(.+)` captures everything after the label
- `/i` makes it case-insensitive
- Test your patterns at regex101.com

Step 4: Test the Parser

1. In the Apps Script editor, select `checkForNewApplicationEmails`
2. Click **Run**
3. Check **View > Logs** to see what data was extracted
4. Verify the new row was added correctly to your sheet

8. TROUBLESHOOTING

ISSUE	SOLUTION
-------	----------

Gmail monitoring is not working	1. Check Gmail authorization (re-run the function and click "Review Permissions") 2. Verify email subject line matches EXACTLY: "Amador - Survey Completed - Bank Trial Member." 3. Check View → Logs for parsing errors 4. Test with a manual test email to club@amadorclub.com
Email data is not parsing correctly	1. Copy the actual email body text 2. Update regex patterns in <code>parseApplicationEmail()</code> 3. Test regex at regex101.com 4. Check the Logger output for what was captured
Duplicate members are being added	The script automatically checks for duplicate emails. If duplicates still appear, check that Column D (Email) values match exactly (no extra spaces).
Emails not sending	Check the "Last Email Sent" column. If it has a value, the script thinks it already sent the email. Clear that cell to re-test.
Script error: "Cannot find sheet."	Ensure your sheet tab is named exactly "TrialMembers" (no spaces).
Wrong date calculation	Verify column A contains valid Date objects, not text strings. Format column A as Date.
Staff not receiving alerts	Check the CONFIG variable at the top of the script to ensure the correct staff email is set.
Web app endorsement buttons not working	1. Verify you deployed as Web App (Deploy → New Deployment) 2. Check that WEBHOOK_URL in CONFIG matches your deployment URL 3. Ensure "Who has access" is set to "Anyone" 4. Test the URL directly in a browser with parameters

9. SUMMARY - WHAT TRIGGERS YOUR AUTOMATION

🔗 Complete Trigger System:

1. 📧 **Email Arrives:** "Amador - Survey Completed - Bank Trial Member" → Checked hourly → Automatically added to sheet → **Staff receives Template 1** (New Application Alert)

2. 🕒 **Daily at 8 am:** Checks Column Q for payment failures → **Member receives Template 4** (Payment Failure Alert)

3. 🕒 **Daily at 9 am:** Reviews all members → Sends Month 1-6 emails → **Members receive Templates 2, 3, 5, 6, 7, 10** (Welcome, Monthly Check-ins, Urgent Reminder) → **Staff receives Templates 11, 12, 15, 17** (Tasks, Ready for Review, Expiration, Cancellation) → **Endorsers receive Template 8** (Endorsement Request at Day 120)

4. 👤 **Staff Updates Status:** Column P updated → Next day at 9am, triggers: • "Active" → **Member receives Template 2** (Welcome) • "Full Member" → **Member receives Template 13** (Approval) + **Staff receives Template 12** (Ready for Review) • "Canceled" → **Member receives Template 16** (Cancellation) + **Staff receives Template 17** (Cancellation Notice) • "Expired" → **Member receives Template 14** (Expiration) + **Staff receives Template 15** (Termination Task)

5. ⚙️ **Endorser Clicks Button:** YES/NO in Template 8 → Instant update to Column N or O → **Endorser receives Template 9** (Confirmation Page) → Once two are complete, **staff receives Template 12** (Ready for Review)

✅ Your Automation is 100% FREE

At your expected volume (20-50 trial members), you'll use less than 10% of Google's free tier limits:

- ✅ Gmail: 100 emails/day limit (you'll send 10-30/day)
- ✅ Execution time: 90 min/day limit (you'll use ~5 min/day)
- ✅ Triggers: 20 trigger limit (you use 3 triggers)
- ✅ Web app: 30 concurrent connections (you'll have 1-5/day)

You won't need to pay anything unless you scale to 200+ simultaneous trial members.

10. EMAIL TEMPLATE PREVIEWS

Below are visual previews of all 17 email templates as they appear to recipients. Use these for reference when customizing content or troubleshooting.

📧 **Template Reference:** These are HTML previews showing exactly how emails will look in recipients' inboxes. Variables like `${row[COLS.FIRST_NAME]}` are replaced with actual data when sent.

Template 1: Staff Notification - New Application

ACTION REQUIRED: NEW TRIAL APPLICATION

A new Bank at Amador trial application has been submitted.

Applicant Details:

- **Name:** John Smith
- **Email:** john.smith@example.com
- **Phone:** (555) 123-4567
- **Company:** Tech Corp
- **Title:** CEO

Staff Action Items (Complete within 24 Hours):

1. Verify \$50 payment processed successfully
2. Enroll the member in "Trial Membership" status in the system
3. Grant "Bank Access" permissions (ground floor access)
4. Change status to "Active" to trigger the welcome email

Bank at Amador | club@amadorclub.com | apply.amadorclub.com/bank-trial

Template 2: Welcome Email - Day 1

BANK AT AMADOR

WELCOME TO YOUR TRIAL MEMBERSHIP!

Dear John,

We are thrilled to welcome you to **Bank at Amador**! Your 6-month trial membership is now active.

Your Trial Membership Details:

- **Duration:** 6 Months
- **Monthly Cost:** \$50 (billed automatically)
- **Access:** Ground floor facilities
- **Start Date:** Today

What's Next?

To convert to a Full Membership, you'll need **2 endorsements** from current members.
